Introduction

The CO-GREEN project activities kicked-off in December 2022 with the planning of Event no. 1, which entailed the identification of the seminal group of stakeholders in the partner territories, their invitation and active involvement. The response from local stakeholders has been beyond expectations: when asked to register to the transnational webinars, 109 people sent in their forms, representing 4 countries.

The two transnational webinars have represented the online platform to launch discussion between the group of the project partners and the local stakeholders and experts, and to promote their involvement in the co-design of the building blocks of the CO-GREEN intervention model.

Each webinar lasted 4 hours, and took place on the Zoom interactive conferencing platform, where participants could attend the plenary sessions and join restricted working groups or breakout sessions.

The project Applicant (CAL) managed and promoted the two online events with the support of UNITORUN. They set the agenda and allocated the preparatory tasks to UNITOV and UNIRIJEKA, which specifically proposed the key methodological elements and led the discussion with the stakeholders.

At the beginning of the first webinar, CAL and UNITOV introduced the project's shared workspace, namely "Padlet" granting access to all the registered participants. They provided their inputs and interacted on Padlet throughout the webinars, actively contributing to the development of documents and input papers. This shared workspace will be used throughout the project lifespan.

The Event Description Sheet (EDS)

PROJECT	
Participant:	[1] - [Stowarzyszenie Centrum Wspierania Aktywnosci Lokalnej, CAL] [2] - [Uniwersytet Mikolaja Kopernika W Toruniu, UMK] [3] - [Sveuciliste U Rijeci, Filozofski Fakultet U Rijeci, UNIRI] [4] - [Udruga Zmergo, ZMERGO] [5] - [Forum Nazionale Terzo Settore, FNTS] [6] - [Universita degli Studi di Roma Tor Vergata, UNITOV] [7] - [Euracademy Association, EURACADEMY] [8] - [Dimos Karditsas, MUNICIPALITY OF KARDITSA]

Total number of participants:	109	From total number of countries:	4

Description

Provide a short description of the event and its activities.

The webinars were designed as induction events, bringing together groups of seminal stakeholders from the partner territories, namely:

- From Poland: Elbląg, Górnó, Starachowice, and Wiązowna (Webinar 1: 12 participants; webinar 2: 18)
- Italy: Cosenza, Jesi (Webinar 1: 15 participants; webinar 2: 11)
- Croatia: Primorsko-Goranske Županije – PGŽ (Webinar 1: 15 participants; webinar 2: 15)
- Greece: Karditsa (Webinar 1: 12 participants; webinar 2: 11)

January 17th, 2023: The first webinar set off with a keynote speech by UMK “Sustainable local development - key challenges” that captured the scenario features characterising the urgent green transition (presentation in Annex 2). The participants were asked about their expectations about the planned work; the following slide of Mentimeter shows the interesting inputs:

Then, they were divided into “country groups” with the mandate to present themselves and their local communities in terms of:

- Demographic, social and economic profile
- Socio-cultural, environmental, historic, etc. features
- Social animation activities (civic participation)
- Main challenges to improve the quality of life of the residents
- Main environmental challenges and measures currently being implemented

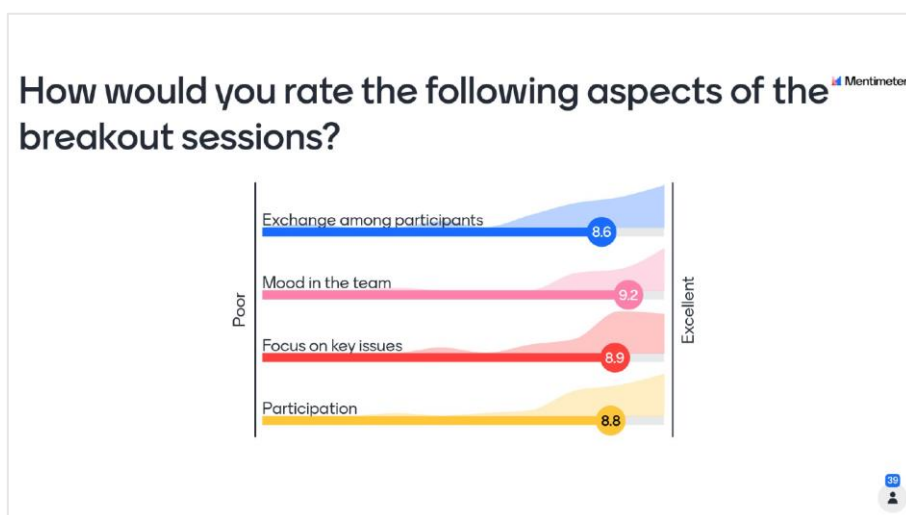

The selected conferencing platform was Zoom, which easily allows for plenary sessions and breakout sessions, with the possibility to record the video and audio of the meetings. In order to ensure that participants could contribute actively in the discussion and in the development of contents, the interactive platform “Padlet” (<https://padlet.com>) was used in a very effective way. Padlet is going to be used throughout the project lifespan.

In the breakout sessions, participants could use their own national language. This decision was taken in response to the need to encourage the effective participation of the attendees, overcoming the obstacle of using English as a working language. The representatives of the project partners took part in the breakout sessions with the role of moderators. They mainly helped focus on the topics, took notes of the presented contents and acted, in some cases, as *rapporteurs* in the final plenary session.

The output of the first webinar comprises the four padlets that provide a sort of “green screenshots” of the involved territories. Whilst the details can be read in Annex 3, some general similarities have been detected, mainly with regards to: ageing population, population decline, increasing mistrust in institutions when it comes to improving quality of life and sustainable economic practices; lack of communication (the lockdowns due to the pandemic are partly responsible for this), fragmented society; major environmental risks, due to bad waste management, industrialisation or de-industrialisation processes; need for education pathways targeting all the population with ad hoc messages and registers. In all communities, the presence of civil society organisations (associations, NGOs, non formal groups, etc.) is a promising feature. These results were systematised and prepared to be further developed in the second webinar.

At the end of the webinar an *instant evaluation* was launched; the results show the majority of respondents’ largely positive feedback. In particular, respondents valued the possibility to speak out, interact with peers and experts, and listen to other experiences. Also, the continuity of the proposed activities and their hands-on approach were considered as strong points.

The following slide presents the respondents’ appreciation about some key aspects of the webinar:

January 23rd, 2023: With the second webinar, participants moved on from the results of the first meeting and discussed about the following topics:

- Needs and priority/key intervention areas
- Desiderata and aspirations for a green transition in their community
- Ideas for an action dealing with the identified priority areas
- Available resources and assets

The collaborative work in the breakout sessions was intense, with attendees agreeing on general statements and visions, but also dissenting on how to prioritise measures and solutions. In general, the main problems that attendees identified refer to the management of town services and spaces (e.g. public transport, waste management, accessible housing, accessible public spaces such as market places), activation of young people who tend to be disengaged; solutions to include “new” citizens, mainly migrants so to be a resource for the communities. The role of tourism, as a sustainable practice, is seen by most communities as an asset to be further explored and implemented with sustainable practices. Also the experiences of “energy communities” are seen as a possible breakthrough to support the costs of the green transition. In this respect, the participants showed awareness about the fact that citizens must bear part of the costs of moving from a carbon-based society and economy to sustainable sources of energy, and to careful and sustainable management of land, water and air. Although the actors to be engaged are already in place, there seems to be the need to identify methods and practices to build consensus and voice their demands.

At the end of the webinar the *instant evaluation* was launched; the results consolidate the positive feedback about the webinar (programme, schedule, activities) and highlight the respondents’ aspirations to ensure continuity to this kind of participatory and multi-stakeholder work.

Annexes

Annex 1: The webinars' programmes

Annex 2: UMK's presentation (from webinar 1)

Annex 3: The padlets about the territories' profiles

Annex 4: The padlets with the needs and ideas

Co-Green International Webinar I 17th January 2023

Opening time: 9:00 CET
Zoom: <https://zoom.us/my/iadprojects>
Password: iadpro22

Let's meet together Mapping of Co-green territories at the start

WEBINAR AGENDA

9.00-9.15 **Registration and technical setup for participants**

PART 1 (common) – in English

9.15-9.30 **Welcome and sharing of the house rules**

Dr Izabela Grabowska (CAL), Prof. Andrea Volterrani (Tor Vergata University)

9.30-9.40 **Information about the project - challenges, goals, tasks, expected results**

Dr Izabela Grabowska (CAL), Elisa Mancinelli (Tor Vergata University)

9.40-10.00 **Sustainable local development - key challenges**

Dr Wojciech Goszczyński (UMK), Prof. Arkadiusz Karwacki (UMK)

➔ Invitation to **parallel sessions**: for each territory, a group will be formed (5')

Co-funded by
the European Union

PART 2 (in national groups) - in national languages

10.05-10.20 **Participants prepare their shared profile on the webinar's padlet**

10.20-10.40 **Coffee Break**

10.40-11.40 **Presentation of local communities - resources, problems, needs, social and environmental profiles**

(Moderated by members of the project's national teams)

Questions:

- What is the demographic, social and economic profile (characteristics) of the territories?
- What socio-cultural, environmental, historic, economic, etc. features characterise the territory?
- What are the main challenges in terms of improving the quality of life of the residents of the territories, what are the needs of the residents that require reflection, investment, new solutions?
- What social animation activities (support for self-organisation processes, volunteering, civic participation) are carried out in the territories?
- What are the main environmental challenges in the territories and are measures currently being implemented?

→ Invitation to the **plenary session** (5')

PART 3 (common) - in English

11.45-12.30 - **Summary of presentations in national groups (profiles, typical problems and challenges)**

(Group rapporteurs or facilitators)

PART 4 (common) - in English

12:30-12.45 **Wrap-up session and Q&A**

12:45-12.55 **Just-in time evaluation of the webinar**

12:55-13.00 **Invitation to joint activities and closing of the webinar**

Dr Izabela Grabowska (CAL), Prof. Andrea Volterani (Tor Vergata University)

Co-Green International Webinar II

23rd January 2023

Schedule: from 9.00 to 13.00 CET
Zoom: <https://zoom.us/my/iadprojects>
Password: iadpro22

Let's meet together #2

From Mapping of Co-green territories to problem framing: solutions for our green(er) communities

WEBINAR AGENDA

9.00-9.15 **Registration and technical setup for participants**

PART 1 (common) – in English

9.15-9.30 **Welcome and sharing of the house rules**

Dr Izabela Grabowska (CAL), Prof. Andrea Volterrani (Tor Vergata University)

9.30-9.40 **Information about the project - challenges, goals, tasks, expected results**

Dr Izabela Grabowska (CAL), Elisa Mancinelli (Tor Vergata University)

9.40-10.10 **Main contents and focal points highlighted in the first webinar.**

Recap of the padlets about the involved communities

Wojciech Goszczyński (UMK) for Poland

Silvio Cilento (Forum Terzo Settore) for Italy

Frosso Dimitrakopoulou (Euracademy) for Greece

Sarah Czerny (University of Rijeka) for Croatia

➔ Invitation to **parallel sessions**: for each territory, a group will be formed (5')

PART 2 (in national groups) - in national languages

10.15-10.30 Participants prepare their shared profile on the webinar's padlet

10.30-10.45 **Coffee Break**

10.45-12.00 **From analysis to problem framing: solutions for green(er) communities**
(Moderated by members of the project's national teams)

Questions:

- NEEDS and PRIORITY/KEY INTERVENTION AREAS
- DESIDERATA and ASPIRATIONS for a green transition in their community
- IDEAS for an action dealing with the identified priority areas
- AVAILABLE RESOURCES and ASSETS

➔ Invitation to the **plenary session** (5')

PART 3 (common) - in English

12.05-12.40 - **Summary of presentations in national groups (profiles, typical problems and challenges)**
(Group rapporteurs or facilitators)

PART 4 (common) - in English

12:40-13.00 **Wrap-up session**

Q&A

Just-in time evaluation of the webinar

Invitation to future project activities

Closing of the webinar

Dr Izabela Grabowska (CAL), Prof. Andrea Volterani (Tor Vergata University)

Sustainability and environmental challenges

Arkadiusz Karwacki, Wojciech Goszczyński

Institute of Sociology, Nicolaus Copernicus University in Toruń

Since 1850, average global temperatures have risen by 1 degree Celsius...

What does this really mean?

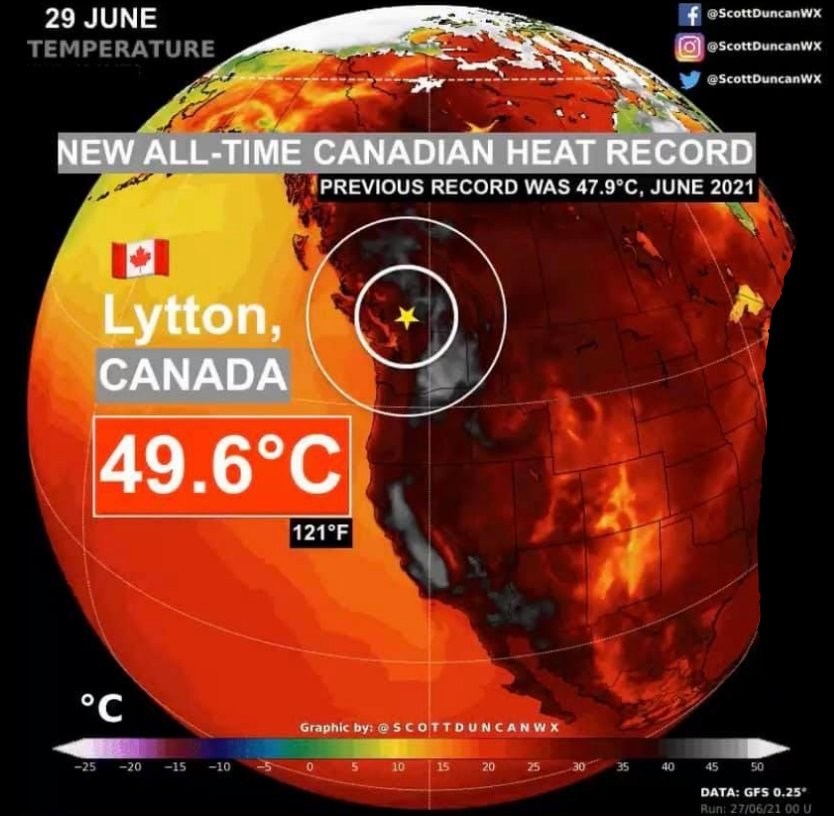

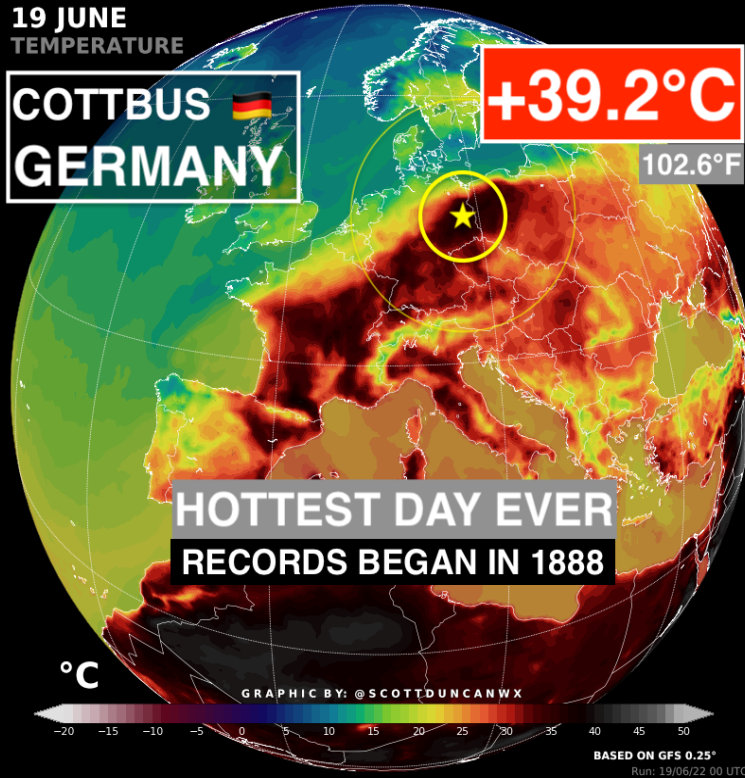

+10 The coldest nights in the Arctic can be 10°C warmer.

+4 Some regions in the Arctic have already warmed by 4°C.

+5 The warmest days in Mumbai can be 5°C warmer.

A memory of summer...

... .. 25 degrees C in mid-October in Poland

Deloitte Climate Sentiment Index

**respondents admitted,
that they are concerned about climate change**

75%

consumers surveyed believe that climate change is the result of human activity

Poles surveyed said they felt concerned about climate change

Respondenci, którzy deklarują zmartwienie zmianami klimatu częściej kupują towary i usługi w oparciu o zasady zrównoważonego rozwoju

58% respondents in Poland declare support for new regulations to protect the climate

EXIT

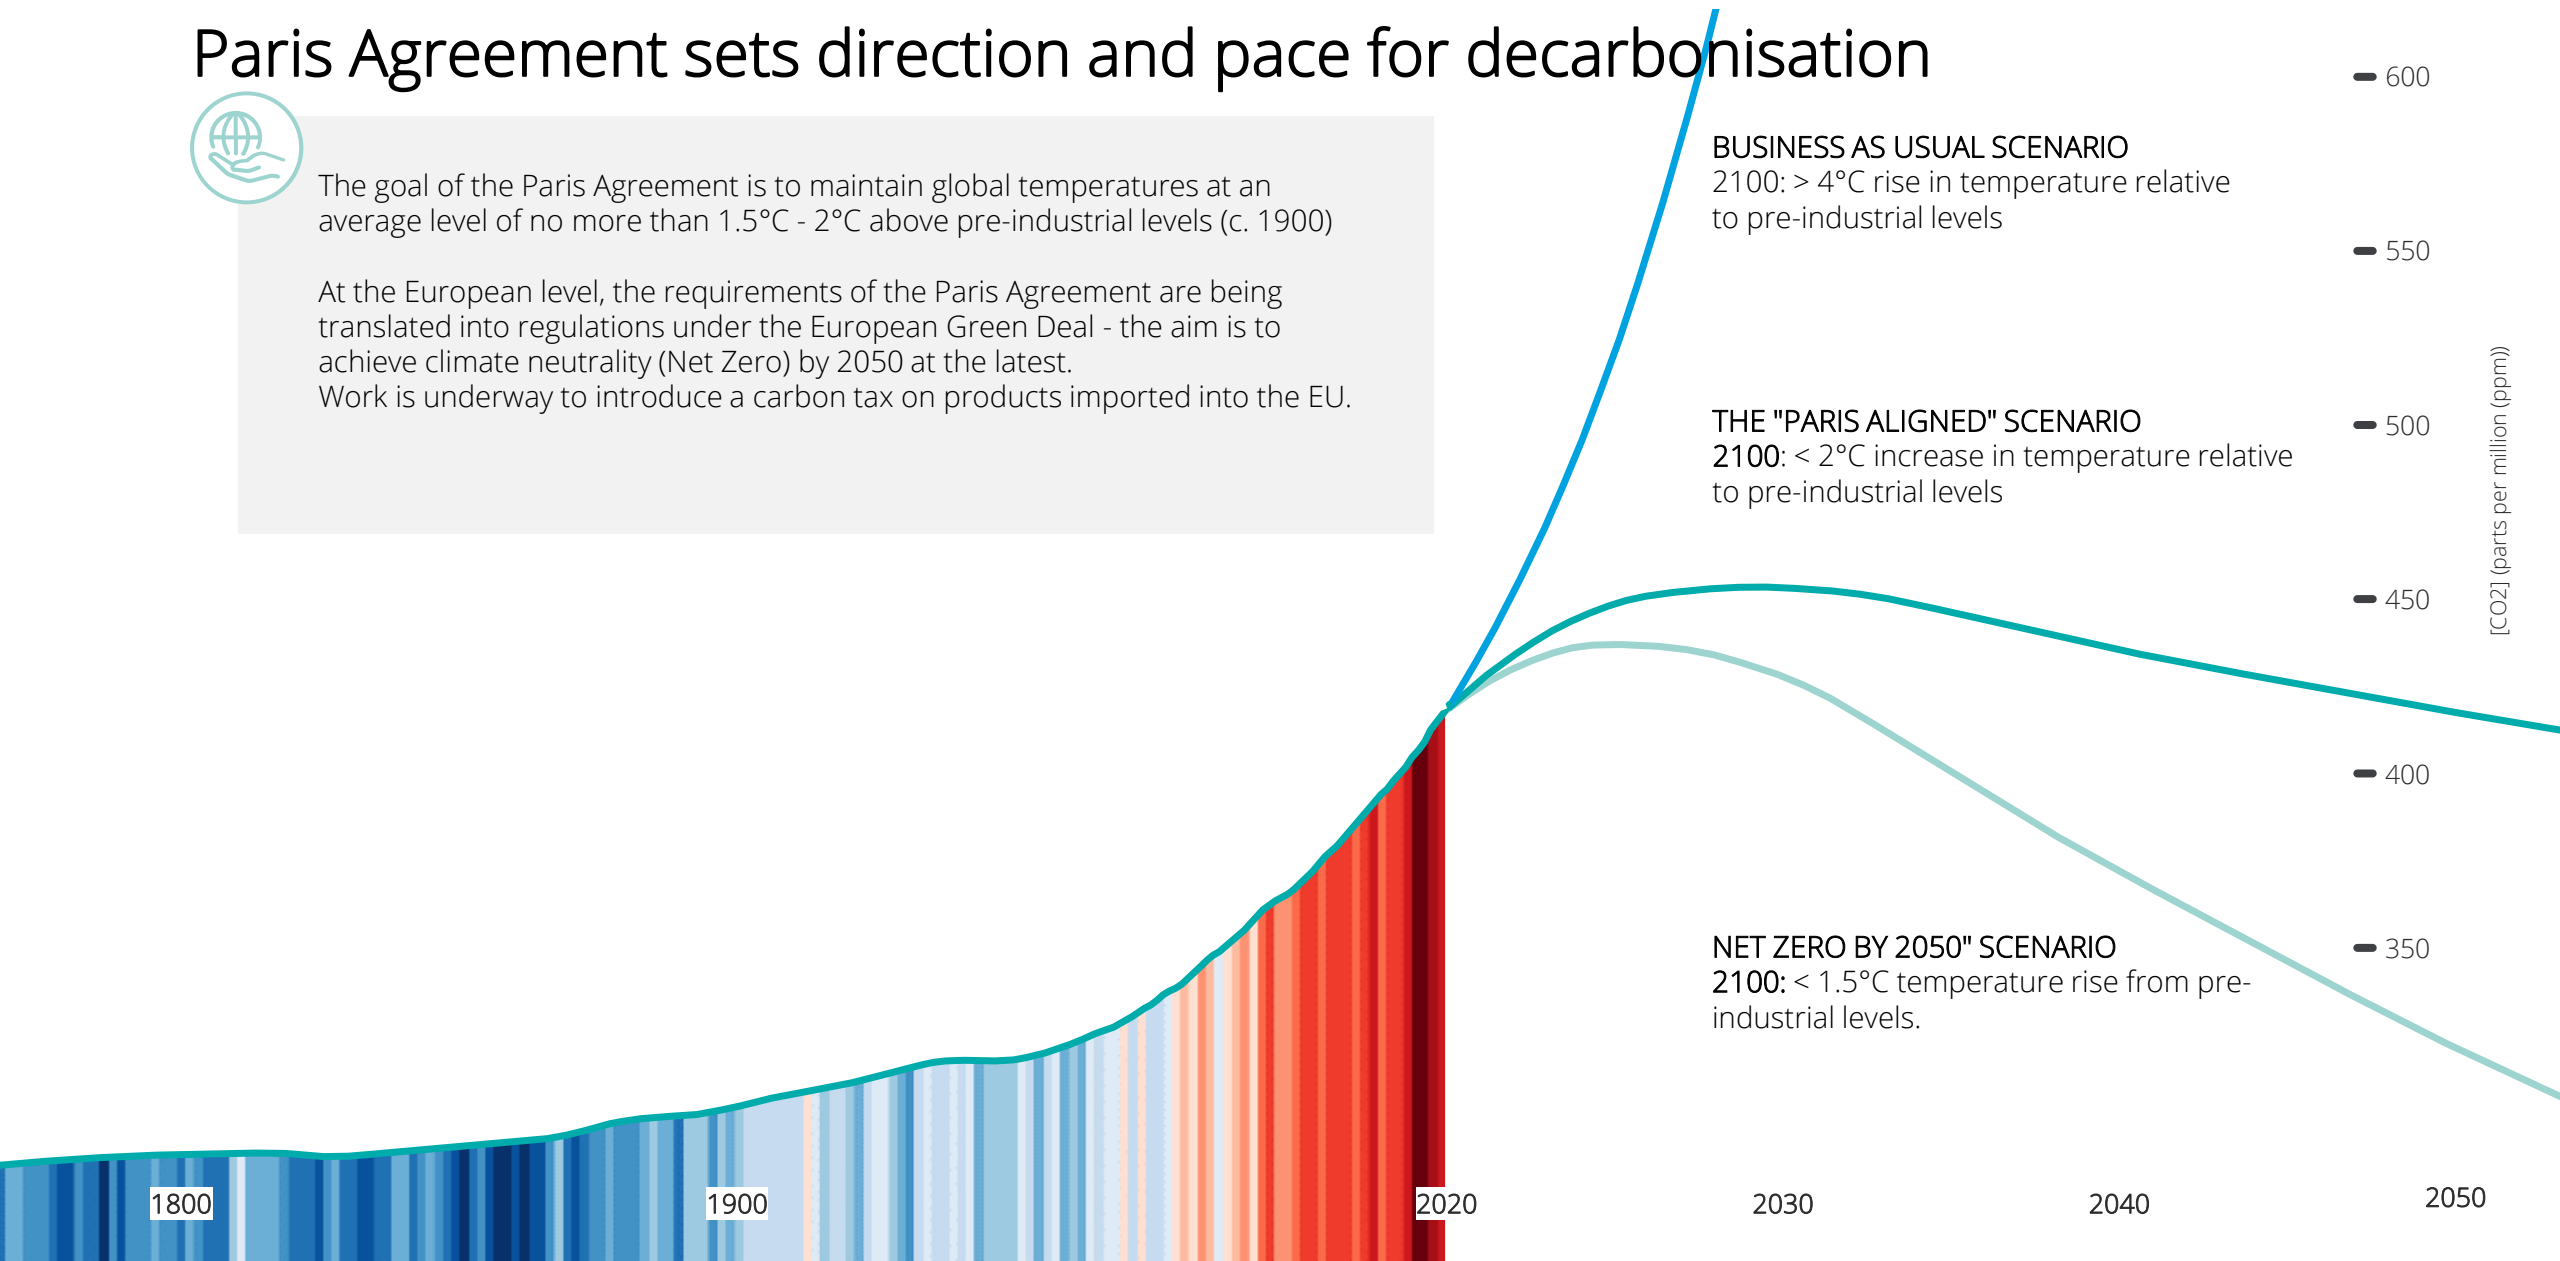

Good enough for now is perfect. Not to this extent...

Paris Agreement sets direction and pace for decarbonisation

The goal of the Paris Agreement is to maintain global temperatures at an average level of no more than 1.5°C - 2°C above pre-industrial levels (c. 1900)

At the European level, the requirements of the Paris Agreement are being translated into regulations under the European Green Deal - the aim is to achieve climate neutrality (Net Zero) by 2050 at the latest. Work is underway to introduce a carbon tax on products imported into the EU.

BUSINESS AS USUAL SCENARIO
2100: > 4°C rise in temperature relative to pre-industrial levels

THE "PARIS ALIGNED" SCENARIO
2100: < 2°C increase in temperature relative to pre-industrial levels

NET ZERO BY 2050" SCENARIO
2100: < 1.5°C temperature rise from pre-industrial levels.

UN Sustainable Development Goals

Agenda 2030

The 2030 Agenda contains 17 Sustainable Development Goals (SDGs), which were adopted by UN member states in 2015. They include 169 specific goals to be achieved by 2030.

The suite of SDG's covers complementary and intersecting social and environmental challenges.

ESG stands for Environmental, Social and Governance and refers to three key groups of factors: Environmental, Social and Corporate Governance.

ESG factors are a set of non-financial performance indicators designed to ensure an organisation's accountability. They are taken into account when measuring a company's sustainability maturity.

ENVIRONMENTAL

- Climate change, greenhouse gas (GHG) emissions
- Depletion of resources, including water
- Waste and plastics
- Deforestation and biodiversity
- Tackling waste e.g. of food, Turning the cycle (GOZ)

SOCIAL

- Working conditions and employee safety
- Organisational culture, employee relations, commitment
- Diversity
- Mental health, wellbeing, work-life balance
- Social investment
- Impact of the product on consumer health (e.g. reformulations)

GOVERNANCE

- Corporate governance
- Ethics, anti-corruption - transparency and reputation
- Responsible selling
- ESG/ERM risk management, business continuity and resilience
- Responsible marketing, donation lobbying
- Responsible tax strategy
- Positive impact and minimisation of ESG risks in the value chain - business partners, suppliers

European Green Deal

MAIN OBJECTIVES

- Emission reduction of 55% by 2030 (compared to 1990 levels)
- Net zero-carbon by 2050 (within the EU)

KEY AMBITIONS

-  Striving for climate neutrality
-  Supply of clean and affordable energy
-  Mobilising industry for a closed loop economy
-  Green building construction and renovation
-  Sustainable and intelligent transport
-  Fair, healthy and ecological food production
-  Preservation and restoration of ecosystems and biodiversity
-  Zero-pollution and non-toxic environment

Communities in action: some examples

First ULL workshop in Slupsk, Poland in May 2019

First ULL workshop in Tulcea, Romania in July 2019

First ULL workshop in Wilmington, USA in April 2019

Sustainable communities

RESILIENT COMMUNITIES

CIRCULAR COMMUNITIES

NEXUS COMMUNITIES OF PRACTICES

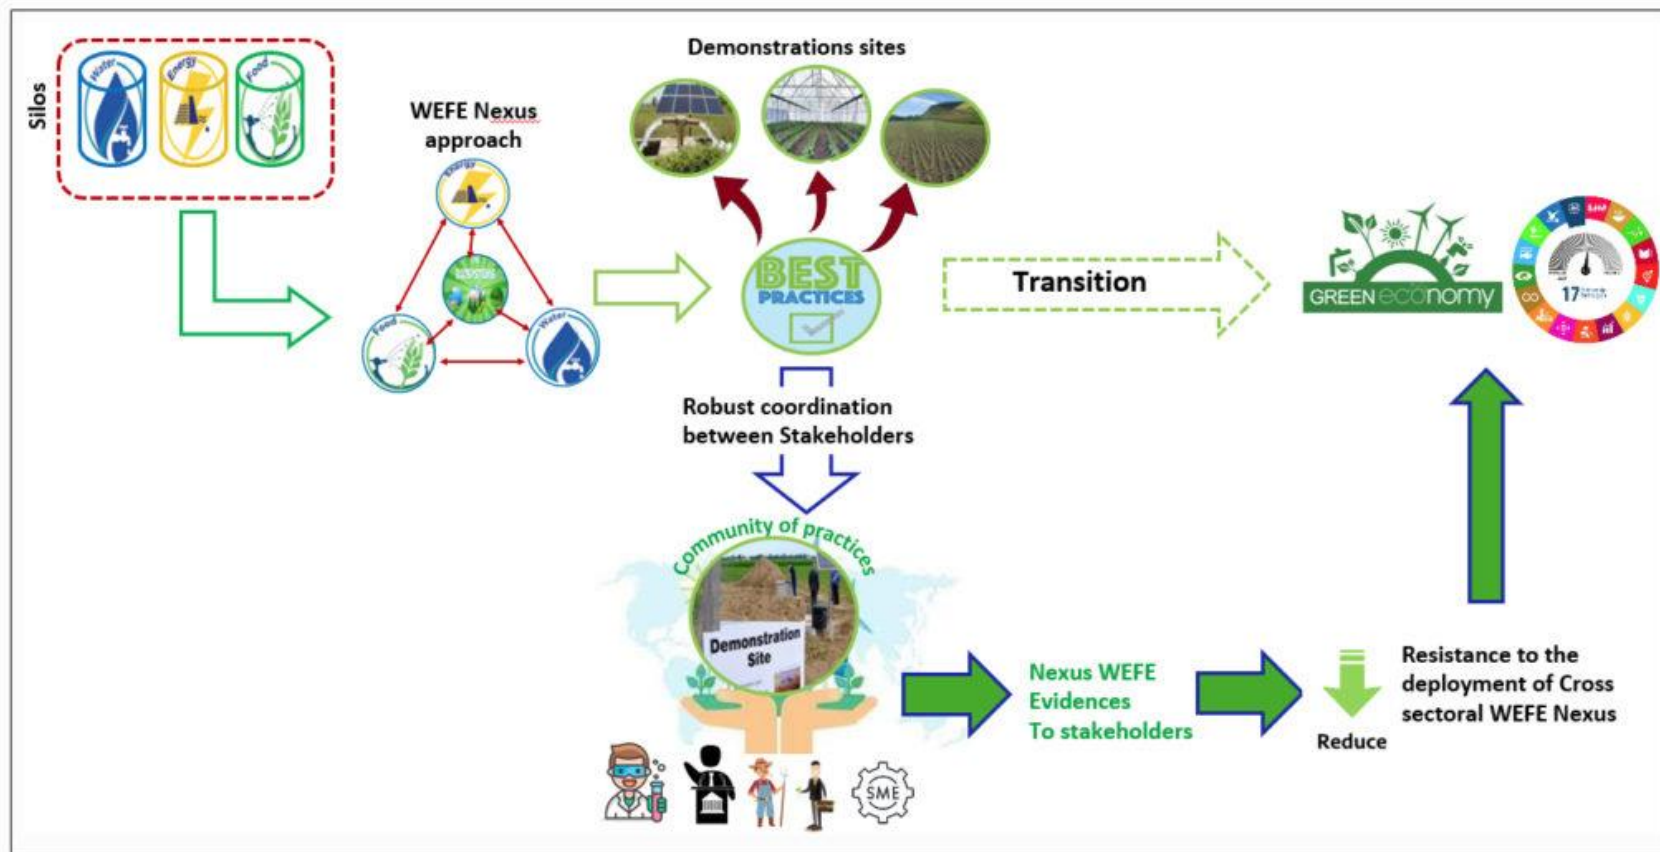

Circular communities

Resilient Communities

NEXUS Communities Of Practices

Summary: taking sustainable development seriously

- 1) Environmental challenges and related public policies present new demands on communities and their developments.
- 2) When we review quality of life in local communities, we are no longer looking at a single area but about relationships in which the environment plays a pivotal role.
- 3) Local solutions to global problems are calling for the involvement of local communities, a re-evaluation of resources, a re-examination of practices in the community.
- 4) they also require reaching beyond institutional silos, awareness needs to be paid to the linkages between the various sectors that influence the quality of life in local communities.

Some information...

The Panebianco community was created within the Panebianco district, a neighbourhood of medium-large size (15,000 inhabitants) of the town of Cosenza. In fact, suburban districts sprang up alongside the bourgeois districts in Cosenza. The name derives from the very old bakery of which only a millstone once remained and became a monument.

Today, the background of Via Panebianco has totally changed: it is home to high buildings (our "skyscrapers"), the renowned Italiana Hotels (formerly Holiday Inn), amusement arcades, kebab shops and Chinese shops; yet it continues to remain a marginalised area of the city. Turning our noses up at the newly-built flats that clash with the context, it is natural to think that, given the area, they will remain empty (or could become a refuge for fugitives, as has already happened).

BERTONI1 JAN 28, 2023 05:03PM UTC

The Cosenza territory

Cosenza is the capital of a province of 63 561 inhabitants with 150 municipalities, located in Calabria (southern Italy).

BERTONI1 JAN 28, 2023 05:07PM UTC

The centrality of Via Panebianco

Via Panebianco (Panebianco Street) was born out of an agricultural context and then transformed into an urban suburban context.

The street used to be a thoroughfare between Cosenza and the whole province. Market under the causeway with many hawkers. This frontier road led to the establishment of a large hotel. The first department stores and shops were established on Via Panebianco because there was no space in the centre

BERTONI1 JAN 28, 2023 05:05PM UTC

Spatial issues

Centre/periphery issue. Urban transformations between centre and periphery.

It was home to people who chose to live there.

Popular/bourgeois appearance. It is an ungreen neighbourhood: absence of green spaces and the lifestyle is also ungreen

Socio-cultural, environmental, historic, etc. features of your territory

BERTONI1 JAN 28, 2023 05:06PM UTC

When spatial issues meet the human dimension

Urban transformations have taken place based on the contradictions related to the juxtaposition "centre" and "periphery"

ANONYMOUS JAN 28, 2023 05:08PM UTC

Urban contradictions

Social animation activities (civic participation) in your territory

BERTONI1 JAN 28, 2023 05:14PM UTC

Lack of meeting places and spaces

Urban spaces for people to meet, stay, collaborate... are missing.

Squares and other common spaces should be redeveloped

– BERTONI1

Lack of activities within existing places and spaces – BERTONI1

BERTONI1 JAN 28, 2023 05:08PM UTC

Young people are leaving (or have already left)

Young people have left or want to leave because no motivation is offered to stay. Those who stay are usually - and unfortunately - unemployed

BERTONI1 JAN 28, 2023 05:09PM UTC

Sense of belonging and sense of community

A sense of community is perceived.
Non-ghettoised neighbourhood

Main challenges to improve the quality of life of the residents

BERTONI1 JAN 28, 2023 05:10PM UTC

New role to attract people - to stay!

Trying to make the neighbourhood no longer a transit area but to give it a role and the right protagonism

BERTONI1 JAN 28, 2023 05:13PM UTC

Environmental problems: Waste management and abandonment

Trash is abandoned on Via Panebianco. The street itself also seems to be a neglected place.

The problem is that we have to give dignity also to neighbourhoods that are not part of the city centre, such as Panebianco.

Since it is not central and not a front for the city, situations are allowed that would not be tolerated in other areas, such as the systematic abandonment and accumulation of waste.

Bringing the culture of beauty back to areas that are lived in purely by their inhabitants.

Main environmental challenges in your territory and measures currently being implemented

BERTONI1 JAN 28, 2023 05:15PM UTC

Our common spaces need to change!

Increasing the quality of life: living space, circularity.
Transforming concrete spaces into green, living spaces

BERTONI1 JAN 28, 2023 05:17PM UTC

Live the common spaces up

Citizens need to go back to the streets and squares, populate the common spaces, with care and mutual respect.

"Green" can be the solution to bring some beauty to these places

CROATIA_Profile of the territory of PGŽ / Primorsko-goranske županije

Presentation of local communities - resources, problems, needs, social and environmental profiles

SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA JAN 16, 2023 08:09AM UTC

Demographic, social and economic profile of your territory

SCZERNY1 JAN 19, 2023 01:43PM UTC

Primorje-Gorski Kotar County

- o Coastal, mountainous and island areas,
- o Population of approx. 300,000 inhabitants,
- o Tourism important economic branch BUT low wages, poor working conditions, large migrant workforce needed to sustain it (in hotels),
- o Most employment in medicine (public and private institutions) and in the wider public sector (e.g. schools, local government, university....).

SCZERNY1 JAN 19, 2023 01:30PM UTC

Ageing Population

- o Disconnected, dissatisfied and passive.

SCZERNY1 JAN 19, 2023 01:31PM UTC

Population Decline

- o From 2011 - 2021, the county has lost 10% of its population,

- o Migration,
- o Low birthrates.

Socio-cultural, environmental, historic, etc. features of your territory

SCZERNY1 JAN 19, 2023 01:32PM UTC

INA Refinery

Petrol refinery (now closed) located in the city centre.

SCZERNY1 JAN 19, 2023 01:32PM UTC

Difference between Coastal and Inland Populations

- o De-population of Gorski kotar (mountainous region).

SCZERNY1 JAN 19, 2023 01:29PM UTC

Public Transport Infrastructure

- o Difficult to reach inland areas and islands,
- o Poor road connections, ferries.

SCZERNY1 JAN 19, 2023 01:31PM UTC

Historical Influences

- Historically are not used to the ownership of their city, therefore lack of participation in public affairs.

Main challenges to improve the quality of life of the residents

SCZERNY1 JAN 19, 2023 01:11PM UTC

Corruption

- Corrupt building practices
- Law/Regulations are changed to enable investors to "legally" build - e.g. change green land to building

SCZERNY1 JAN 19, 2023 01:12PM UTC

Lack of Trust in Institutions

- People don't *believe* in institutions - state, local and other decision making actors
- This has the knock-on effect of a lack of interest to engage in participatory projects because of not believing in the underlying motivations of these decision-makers/institutions
- People feel that they cannot make change

SCZERNY1 JAN 19, 2023 01:15PM UTC

Lack of Motivation in the Wider Community

- Partly because of the ageing population, but also involves younger populations
- Lack of motivation has knock-on effect of absence of interest in engaging in activist work

SCZERNY1 JAN 19, 2023 01:15PM UTC

Lack of Competences

- Absence of expertise in population
- Citizens need to be educated to be able to take an active role in making change

SCZERNY1 JAN 19, 2023 01:14PM UTC

Communication with Local Population

- City and Local Governmental bodies do not advertise their "consulting with the public" activities or events beyond what they are required to do by law, [e.g. they put a call for meetings only on their website, and do not advise the meeting in wider media OR organise a meeting at "difficult" times (Christmas) when the public are occupied elsewhere].

SCZERNY1 JAN 19, 2023 01:16PM UTC

Drop in Number of Inhabitants in PGŽ

- Lack of economic opportunities, people are moving away (City of Rijeka has "lost" 10,000 people in ten years)

- Low birthrate

SCZERNY1 JAN 19, 2023 01:29PM UTC

General Economic Situation

- Problematic relation between economic development and green issues (priority in problems),
- Difficult personal financial situations affects citizens engagement in green issues (e.g. you have to be wealthier to buy "ecological" products).

SCZERNY1 JAN 19, 2023 01:29PM UTC

Tourism

- Majority of tourist activities (e.g. accommodation) are at the individual level (i.e. rent out individual apartments) - may change with a change in fiscal policies,
- Lack of interest in "green issues", primary focus is profit,
- Hotels have more interest in "green issues", realise importance of flora and fauna and also demands from tourists,
- Maritime region that is overcrowded in summer and dead in winter - need to develop different tourist regions (away from the coasts), develop all year round tourism,
- Foreign ownership of apartments,
- Most amenities serve tourists, local population feels ignore - as a high end tourist destination Opatija is expensive and unaffordable for young families.

SCZERNY1 JAN 19, 2023 01:29PM UTC

Social Isolation

- Lack of communication between people (pandemic partly responsible for this), fragmented society,
- Lack of education of demographic rights, people don't realise they have the opportunity to make change.

SCZERNY1 JAN 19, 2023 01:22PM UTC

Inadequacy of State Inspectors

- Small number and not effective to carry out controls on building work and tourist activities

SCZERNY1 JAN 19, 2023 01:23PM UTC

Food Production

- Food supply chain is too long,
- Food supply chain is insecure,
- High environmental footprint of food supply chain.

Intergenerational Relations

- Need to encourage inter- and intra- generational relations

Social animation activities (civic participation) in your territory

Local Partnerships

- Citizen initiatives - local population work with the City of Rijeka (City offers financial support) on projects for the local environment,
- Work between NGOs and faculties - local food production, sustainable gastronomy,
- "Green Telephone",
- Cleaning activities - stimulating voluntary work, also local firms increasingly want to be included.

Motivation and Education of Local Population

- Engage citizens to become active participants in the life of the community,
- Boost volunteerism, encourage creative processes for youth,
- Nature appreciation programs for families ,
- Educate citizens on RRRRR and how to be happier with less spending,
- Neighbourhood events to encourage the sense of belonging and co-operation, create resilience goals (sharing, solidarity, repair shops etc.).

Main environmental challenges in your territory and measures currently being implemented

Remains of INA (Refinery)

- Remnants of refinery need to be cleared up.

Invasive Species

- Land (*Ailanthus altissima*, Tree of Heaven pojasen)
- Sea (*Mnemiopsis leidyi*, Sea Walnut, rebraš)

Small Hydro-Electric Plants

- Excessive building of hydro-electric plants,
- Inadequate studies (fragmented) of their impact.

Mariščina Recycling Plant

- Not working properly and not being resolved at the political level.

Reusable Energy Sources

Microplastics

- 80% fish have micro plastics in them.

Waste water

- Disposal of waste water into the Kvarner bay

Gorski Kotar Forests

- Ice storm in 2014 - 50% of the trees in Gorski kotar were damaged,
- Poor management of forests by *Hrvatske šume ltd.*, unregulated land ownership.

Sovjak Hole - Crna Jama Sovjak

- Dangerous material waste from the refinery has not been dealt with
- Huge potential for serious ecological catastrophe

Waste/rubbish disposal

- Ineffective waste disposal and recycling.

Lack of Information for Citizens

- Green issues are sometimes in the media, or the focus of meetings such as this one, but local citizens don't know what measures are being taken and in what ways.

Absence of Climate Change on Local Government Agendas

- Climate change is not on the agenda of the local government,
- As a result, tourism as the major economic force continues to be destructive.

Poor Public Transportation

- Expensive to use,
- Ageing infrastructure.

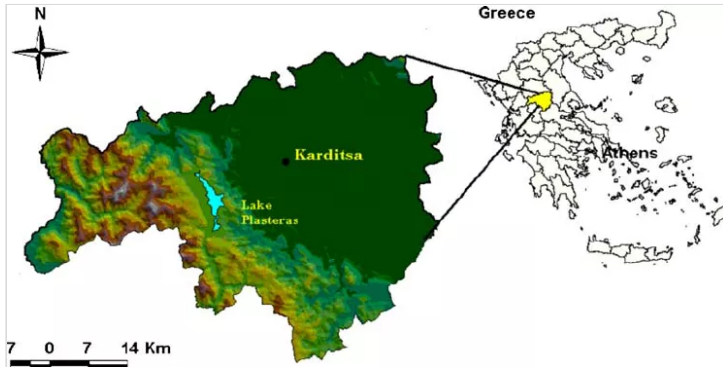

GREECE_Profile of the territory of KARDITSA

Presentation of local communities - resources, problems, needs, social and environmental profiles

SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA JAN 16, 2023 08:11AM UTC

Demographic, social and economic profile of your territory

FROSSO DIMITRAKOPOULOU JAN 28, 2023 04:35PM UTC

AGORITSA ANTONIOU JAN 28, 2023 04:39PM UTC

Demographic & Social profile

According to the 2011 census, the municipal unit of Karditsa had a population of 44.002 permanent residents. The area of the regional unit is 2.576 sq.km, with 47% of the area being lowland and 53% of the area being mountainous. It is worth noting that in terms of population distribution, according to the 2011 census, the percentage of the rural population in the prefecture of Karditsa is 53.3% and the percentage of the urban population is 46.7%.

FROSSO DIMITRAKOPOULOU JAN 28, 2023 04:39PM UTC

Population

The permanent population in 2021 amounts to 106.698 persons and appears significantly reduced, by 6 %, compared to the 2011 census (113.544 persons).

Many times the data are not accurate because residents who are not permanent are not correctly enumerated.

– FROSSO DIMITRAKOPOULOU

ANONYMOUS JAN 17, 2023 09:49AM UTC

Population decrease according to the last census in Region Unit of Karditsa

FROSSO DIMITRAKOPOULOU JAN 28, 2023 04:45PM UTC

Family composition

Small families, usually elderly residents in the villages, not many births

FROSSO DIMITRAKOPOULOU JAN 28, 2023 04:37PM UTC

Abandonment of the countryside

Concentration of population in the city of Karditsa leaving the periphery (towns and villages) of Karditsa due to unemployment

FROSSO DIMITRAKOPOULOU JAN 28, 2023 04:45PM UTC

Immigration and seasonal employment

There is unemployment but over 2000 seasonal workers come for agricultural work mainly from migrants

FROSSO DIMITRAKOPOULOU JAN 28, 2023 04:38PM UTC

Internal and external migration

Mainly the young people who have degrees and knowledge are leaving the countryside to Karditsa and abroad.

ANONYMOUS JAN 28, 2023 04:39PM UTC

Economic activities

Lowland and mountainous area with main economic activity in the primary sector and tourism. There are also a small number of cottage industry & craft enterprises.

AGORITSA ANTONIOU JAN 28, 2023 04:45PM UTC

From waste dumping area to waste information&collection centre

Transforming the areas where there is a systematic accumulation of waste with separate waste collection zones, which is necessary because door-to-door collection in transit areas, such as Panebianco, is not sufficient to maintain decorum

BERTONI1 JAN 28, 2023 05:46PM UTC

Activation of territorial "animators"

As part of the proximity strategy: animators meet the people and provide info, advice, activities on specific issues

BERTONI1 JAN 28, 2023 05:47PM UTC

Possible "meeting facilities"

- Green cafés
- Social cafés
- Social talk shows

SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA JAN 28, 2023 05:47PM UTC

From past attempts...

Building on past experiences (from 2009 onwards?), identifying critical issues and proposing different participation and planning mechanisms.

Green spaces, pedestrian areas, local markets (now km 0)... – SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA

Expanding the network: Not only associations, but also active citizens, institutions, other profit and non-profit actors. To be built step by step... – SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA

SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA JAN 28, 2023 05:48PM UTC

Meeting with local actors

Going 'to meet' the needs of the actors in the area: for example, going to meet shopkeepers in their workplaces

AVAILABLE RESOURCES and ASSETS

ANONYMOUS JAN 28, 2023 05:54PM UTC

The many resources of Via Panebianco

Piazza Sopraelevata 'Il Mulino', Città dei Ragazzi, Hop-là cooperative headquarters, Auditorium De Luca, squares and gardens on the right side, market in Via Padregiglio, Giardino Luigi De Matera, education institutions/schools (Istituto Lanzino)...

The Comitato di Quartiere (neighbourhood committee) needs extra boost

BERTONI1 JAN 23, 2023 10:28AM UTC

Gruppo Facebook "Quelli di Panebianco"

BERTONI1 JAN 28, 2023 05:57PM UTC

Other key actors...

Gruppi Scout (Scouts)
Arci Cosenza (association for social promotion)

Arci Servizio Civile (Civil Service) Cosenza
Traders' association
Sports associations
Order of physicians

Spontaneous citizens groupings
Intercultural initiatives (also involving migrants)
The "Casermette"

CROATIA_PGŽ_Problems, resources & ideas

Presentation of local communities - resources, problems, needs, social and environmental profiles

SCUOLA IAD UNIVERSITÀ DI ROMA TOR VERGATA JAN 22, 2023 01:20PM UTC

LOCAL NEEDS related to GREEN SUSTAINABILITY

SCZERNY1 JAN 23, 2023 09:51AM UTC

1. No Trust in Institutions

SCZERNY1 JAN 23, 2023 09:31AM UTC

2. Resolution of Sovjak jama (Sovjak Hole)

- o A resolution to the situation surrounding the Sovjak Jama needs to be urgently found.
- o If it leaks into the sea then this will be an ecological catastrophe.

SCZERNY1 JAN 23, 2023 09:31AM UTC

3. Reusable Energy Sources

- o Instead of building new installations (such as the HEP hydro-electric plant).
- o Stimulate the use of reusable energy sources.

SCZERNY1 JAN 23, 2023 09:37AM UTC

4. Green Deal / Transition

Lack of education of local population

SCZERNY1 JAN 23, 2023 09:40AM UTC

5. Waste management

- o In general waste management is an issue
- o The local population are not educated
- o Local administrative units are not efficacious

SCZERNY1 JAN 23, 2023 09:52AM UTC

6. Protection of water resources

SCZERNY1 JAN 24, 2023 10:07AM UTC

7. Climate, energy and transport solutions

- o Biodiversity for environmental protection and green regeneration
- o High quality urbanism and the built environment

- o Healthy aging: the potential of digital innovation for social support of the elderly
- o Bioeconomy - forest potential as an opportunity for a circular economy

PRIORITY AREAS OF INTERVENTION

SCZERNY1 JAN 24, 2023 10:28AM UTC

All LOCAL NEEDS (in the first section) can be addressed through the following two priority areas:

SCZERNY1 JAN 24, 2023 10:28AM UTC

1. Improving/increasing communication between citizens and public authorities

SCZERNY1 JAN 24, 2023 10:28AM UTC

2. Improving/increasing communication between public institutions and NGO's

DESIDERATA and ASPIRATIONS for a green transition in YOUR community

ANONYMOUS JAN 24, 2023 09:57AM UTC

postojanje energetskih zadruga

Creation of Energy Collectives – SCZERNY1

IDEAS for an action dealing with the identified priority areas

SCZERNY1 JAN 24, 2023 10:33AM UTC

Volunteer Green Ambassadors / Motivate activism in the local community

- o The Green Ambassadors should be citizens of all ages,
- o They should be empowered in order to actively participate at the community level (offline and not just online activism).

- o Education of students at UNIRI and students of vocational high schools
- o Work/engage with school pupils

Education of students of vocational high schools – ANONYMOUS

SCZERNY1 JAN 24, 2023 10:14AM UTC

Create a shared platform

- o Bring everyone together physically (not online!)
- o Form a "meta" green platform that brings everyone together
- o Then all stakeholders become brokers for the co-creation of shared values/interests.
- o NOTE: The setting up of such a network needs to be very carefully planned and thought about in order to not repeat already existing networks. This means finding shared interests rather than promoting the individual interests of specific shareholders.

REASONING FOR THIS: Current cooperation between NGO's, local authorities and educational institutions is superficial and needs to be deepened in order to be more efficacious.

SCZERNY1 JAN 24, 2023 10:19AM UTC

Raising public awareness in the media

- o Inform and educate citizens about the different initiatives
- o Work with local authorities - workshops and informative leaflets
- o Challenge perceptions of corruption
- o Show what citizens themselves personally get out of these activities
- o Need to show examples of good practice in the media

SCZERNY1 JAN 23, 2023 10:13AM UTC

Implementation of Smart Villages and Inhabited Areas

- o Challenges and solutions for extending the digital transformation
- o Management of Smart Rural Infrastructures
- o Reduce the digital divide between urban and digital areas

SCZERNY1 JAN 24, 2023 10:18AM UTC

Education

SCZERNY1 JAN 23, 2023 10:19AM UTC

Follow examples of good practice

- o Locate and research examples of good practice

SCZERNY1 JAN 23, 2023 10:35AM UTC

"Localise" information

- o Information about green issues is often from elsewhere.
- o Should be connected to the local social context

AVAILABLE RESOURCES and ASSETS

SCZERNY1 JAN 24, 2023 09:53AM UTC

Local NGO's

- o There are a number of NGO's already working in these areas

SCZERNY1 JAN 24, 2023 09:53AM UTC

Local governmental organisations

Local authorities have departments and sections working on "Green issues"

SCZERNY1 JAN 23, 2023 10:45AM UTC

University courses

New Minor's programmes about Ecology are being developed for this academic and the next academic year

SCZERNY1 JAN 23, 2023 10:51AM UTC

Existing networks

Existing networks between schools and NGO's

SCZERNY1 JAN 24, 2023 10:02AM UTC

Finances

- o Possibility to get financing at the EU/national levels.
- o There should be more but it is available.

LOCAL NEEDS related to GREEN SUSTAINABILITY

FROSSO DIMITRAKOPOULOU JAN 23, 2023 09:21AM UTC

Protected Areas

Issues related to the management status, governance form the Athens not locally

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:00AM UTC

New Directive for Water

Issues for quality, ownership and monitoring of consumption, quality out of date existing framework. Proper water management to safeguard the quantity and the quality. Problems in quality were evident last year

FROSSO DIMITRAKOPOULOU JAN 23, 2023 09:29AM UTC

Protection of biodiversity

Increase the number of species, most plants are similar genetically and thus vulnerable to diseases. Protection of species with introduction of new "branches" not related

FROSSO DIMITRAKOPOULOU JAN 23, 2023 09:33AM UTC

Circular Economy models

New innovative ideas

ANONYMOUS JAN 23, 2023 09:40AM UTC

Erosion and desertification are 2 important problems affecting the Thessalian plain and the city of Karditsa.

Climate change with drought have caused desertification conditions resulting in the abandonment of irrigated crops. Due to the drought there is a serious problem with the lack of water. Erosion has been affecting the Thessalian plain for the last decades.

ANONYMOUS JAN 23, 2023 09:48AM UTC

Extreme flooding phenomena

Climate Change has brought about rapid effects such as extreme rainfall with a large volume of water in a very short period of time, resulting in flood phenomena which are destructive both for the environment and for the anthropogenic environment. Floods apart from the devastation in the urban area with what this entails are also destructive for the crops as the flooded fields are unfit to be cultivated for a long time until they are restored.

80% of the city was under water during the IANOS flood. New anti-floods works are required – FROSSO DIMITRAKOPOULOU

FROSSO DIMITRAKOPOULOU JAN 23, 2023 09:49AM UTC

Adoption of sustainable lifestyle

Sustainable consumption of resources

FROSSO DIMITRAKOPOULOU JAN 23, 2023 09:54AM UTC

SAVE AGRAFA

Protection of mountains for new uses (wind power, planning of industrial park). Proper environmental analysis and study of the local biodiversity prior to new development of wind parks by the authorities, not the companies.

FROSSO DIMITRAKOPOULOU JAN 23, 2023 09:57AM UTC

Proper land uses

Conserve agricultural lands and limit other uses. i.e. solar panels. Environmental damages to pristine environment due to new road development.

ANONYMOUS JAN 23, 2023 10:09AM UTC

Η συνειδητοποίηση της σχέσης φύλου και αλλαγής κλίματος, δεν είναι ακόμη και σήμερα αρκούντως "εκτεταμένη", δυστυχώς...

Understand the effects of climate change in venerable populations
– FROSSO DIMITRAKOPOULOU

PRIORITY AREAS OF INTERVENTION

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:28AM UTC

Citizen participation in planning and management

Need to share information with citizens that have limited access to internet and new technologies. Questionnaires, workshops with local stakeholders to address issues related to the sustainable use of local natural resources. We need to understand that the common welfare is above any personal benefit.

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:57AM UTC

Development of the voluntary sector

Increase citizen participation through voluntary initiatives such as recycling events, voluntary clean ups, reforestation.

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:35AM UTC

Female Farmers

Often unofficial, not properly registered not receiving benefits

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:53AM UTC

Development of opportunities in order to attract residents

Health centre, Internet use, accessibility. New business opportunities for young couples, tourism business, new agricultural projects. Need to develop a structure that support new small business. Often young people come but face many hardships and leave.

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:59AM UTC

Increase environmental education programs in Schools.

Vital to formulate environmental educational schemes that include hands-on and experiential learning modules, that address the needs of people from all ages and backgrounds

DESIDERATA and ASPIRATIONS for a green transition in YOUR community

ANONYMOUS JAN 28, 2023 05:21PM UTC

Erosion and Desertification

In order to deal with the side effects of the above, we will have to build local dams, reservoirs that can collect rainwater seasonally, and we will have to use crops that have low water

requirements and are rich in organic matter. In this way the soil will be able to enrich itself over time.

IDEAS for an action dealing with the identified priority areas

FROSSO DIMITRAKOPOULOU JAN 23, 2023 11:10AM UTC

FORUM/AGORA for Sustainable Development

Former initiative with ANKA, a permanent forum for discussion about sustainable development for all stakeholders to interact and discuss ideas and share experiences

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:07AM UTC

Use of treated residual from water sewage plant in agriculture

Use in farms as fertilizer and limit chemicals

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:25AM UTC

Open consultations

Call for participation in policy planning

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:32AM UTC

Introduce new hands-on learning models.

New learning models that help the citizen experience the effects of the climate crisis and the need for the green transition. Especially useful for people in remote rural areas with limited educational background

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:45AM UTC

Celebration of Environment Day

To educate young children about circular economy and sustainable development in schools and increase participation in local voluntary environmental actions.

AVAILABLE RESOURCES and ASSETS

FROSSO DIMITRAKOPOULOU JAN 23, 2023 11:16AM UTC

Active Local Development Company

ANKA has the experience and resources to support local initiatives, is working closely and successfully with local stakeholders

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:40AM UTC

Cooperative structures

ANKA Development Company support as incubator

FROSSO DIMITRAKOPOULOU JAN 23, 2023 11:12AM UTC

Local Unions

Center Female Empowerment, Local Workers Union, etc willing to participate in sustainable development initiatives

FROSSO DIMITRAKOPOULOU JAN 23, 2023 10:55AM UTC

Limni Plastira initiative to attract new residents

Municipality of Limni plastira has a structure that attracts and supports new residents.

FROSSO DIMITRAKOPOULOU JAN 23, 2023 11:11AM UTC

Natural beauty

Pristine environment, beautiful landscape, rich biodiversity.

Evaluation of Webinar 1

As part of the CO-GREEN Quality monitoring, we kindly ask you to spend a few moments to complete this survey.

The few questions are meant to collect your feedback about the 1st CO-GREEN webinar.

You can express your views and suggestions for improvements. We will consider them with attention.

The submitted replies will be anonymous.

Thank you!
